

The perimeter is the distance around the edge of a shape.

a = the length of each side of the square

$$\text{Perimeter} = a + a + a + a$$

Example:

$$\text{Perimeter} = 3 \text{ cm} + 3 \text{ cm} + 3 \text{ cm} + 3 \text{ cm} = 12 \text{ cm}$$

Work out the perimeter for the shapes below. **Show (!!!)** your working outs as in the example above:

$$a = 2 \text{ cm}$$

Perimeter =

$$a = 5 \text{ cm}$$

Perimeter =

$$a = 3.5 \text{ cm}$$

Perimeter =

Area is a measurement of space. The shape below is a triangle. Look at the information.

h = height of a triangle

b = base of a triangle

To work out the area for a triangle you have to multiply base by height and then divide it by 2.

$$\text{Area} = \frac{b \times h}{2}$$

Example:

$$\begin{aligned} b &= 6 \\ h &= 4 \end{aligned}$$

$$\text{Area} = \frac{6 \times 4}{2} = \frac{24}{2} = 24 \div 2 = 12\text{cm}^2$$

Find the area of triangles below. **Show (!!!)** your working outs.

$$h = 3$$

$$b = 4$$

Area =

$$h = 5$$

$$b = 7$$

Area =

$$b = 2.5$$

$$h = 4$$

Area =

There is a sale at Sainsbury's!

Sale price is a price you pay for your shopping. You can work out the sale price by subtracting the discount from the original price.

Discounts:

Food - 2.50

Other - 12.00

$$S = P - D$$

Sale price = original price – discount

Example: Lasagne 7.00 Discount – 2.50

Sale price = $7.00 - 2.50 = 4.50$

Work out the sale price for the rest of the products.

Formulae

$$\frac{A \times B}{100}$$

A- Price e.g. £7

B- Percentage e.g. 5%

--- divide ÷

Example:

$$\frac{£7 \times 5\%}{100}$$

$$7 \times 5 \div 100 = 35 \div 100 = £0.35$$

Discounts : food is 5% off
 Other is 25% off

Work out the discounts for things from the box.
